Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1732

1. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is based on the clause in claim 1 stating "wherein the shear stress at the interface of each layer is 5000 Pa or higher and not higher than 50000 Pa". This clause describes where the required shear stress occurs but the disclosure as filed does not disclose at what point in time during the process the required shear stress occurs such that undue experimentation would be required of one of ordinary skill in the art. It is noted that the interface of or between each layer would exist for as long as the multi-layer foam sheet exists, potentially long after the instantly claimed process is completed.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This rejection is based on the "wherein" clause of claim 1 which was recited in the preceding paragraph. One of ordinary skill in the art would be unable to determine the metes and bounds of the claims because there is no recited point in time during the process at which the required range of shear stresses at the interface of each layer is to be met.
